

Wrya Vakili

AI Engineer | Machine Learning & LLM Solutions | Data Science & Intelligent Systems

Email: wrya.vakili@gmail.com LinkedIn: linkedin.com/in/wryavakili

Github: github.com/WryaV

AI Engineer and Data Scientist with 10+ years of experience building intelligent systems, machine learning solutions, analytics platforms, and AI-powered enterprise applications. Specialized in LLM-integrated systems, recommendation engines, intelligent automation, analytics pipelines, and scalable AI solutions using Python, .NET, SQL, and modern ML frameworks.

CORE EXPERTISE

AI Engineering & LLM Applications

Machine Learning & Recommendation Systems

Data Engineering & Analytics Pipelines

Python, C#, .NET, SQL, Power BI

Enterprise Systems & Intelligent Automation

Optimization, Statistical & Financial Modeling

Cloud, APIs, Azure DevOps & Docker

PROFESSIONAL EXPERIENCE

AI & Intelligent Systems Lead

NextInfiMind | Dubai, UAE | 2025 – Present

- Designed AI-powered enterprise applications integrating LLMs, analytics systems, recommendation engines, and intelligent automation workflows.
- Led development of AI-enhanced ERP systems using Python, .NET, SQL, and enterprise data pipelines.
- Built conversational AI systems enabling natural-language interaction with enterprise databases and organizational workflows.
- Developed AI assistants and document-management solutions using fine-tuned LLMs and structured enterprise data.
- Led technical initiatives involving AI integration strategy, analytics architecture, and intelligent systems development.

AI Engineer & Data Scientist

TOSSAM | Remote | 2025 – Present

- Developed machine learning, recommendation, and analytics solutions for enterprise and operational systems.
- Designed KPI dashboards, data pipelines, and business intelligence solutions using Python, SQL, and Power BI.
- Contributed to scalable AI-enhanced enterprise applications and intelligent workflow automation.

.NET Full Stack Developer

Resource Point AB | Sweden | 2025

- Contributed to development of enterprise B2B platforms using C#, ASP.NET, GraphQL, APIs, and Azure DevOps.
- Supported backend integration, CI/CD workflows, deployment optimization, and scalable enterprise functionality.

Research & Teaching Assistant

Blekinge Institute of Technology (BTH) | Sweden | 2024

- Conducted research in financial modeling, stochastic systems, market co-movement, and productivity analysis.
- Developed regression models, analytical frameworks, and meta-analysis studies using Python, R, and STATA.
- Supported academic teaching and data-driven research projects within economics and industrial management.

Independent Data & AI Consultant

Iran & Remote | 2013 – 2024

- Delivered AI, analytics, and enterprise software solutions across industrial, operational, and business domains.
- Built data warehouses, KPI dashboards, analytics pipelines, and decision-support systems using Python, SQL, and Power BI.
- Developed optimization models, multimedia AI pipelines, and intelligent monitoring systems integrating machine learning and computer vision.
- Led technical initiatives involving AI integration, analytics architecture, and intelligent automation.

Education

PhD, Applied Mathematics

Shahid Madani University of Azerbaijan 2017 – 2021 Focus Areas: Optimization, Stochastic Modeling, Financial Modeling, Risk Analysis

MSc, Applied Mathematics

Shahid Madani University of Azerbaijan 2010 – 2012

BSc, Applied Mathematics

Payam Noor University 2005 – 2009

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals
- .NET Full Stack Development Diploma – Lexicon Sweden

Selected Projects

- AI-Powered ERP Platform: LLM-integrated ERP assistants, analytics systems, and conversational AI workflows.
- Tender Recommendation Engine: ML-based tender prioritization and classification system for enterprise operations.
- Conversational Database Intelligence: Natural-language database querying and AI-driven analytics platform.
- AI Letter Management System: Intelligent document processing and automated response workflows using LLMs.
- Industrial Optimization Platform: Optimization system for turbine-package selection using operational datasets.
- Multimedia AI Pipeline: Image, video, and voice analytics system for AI-based operational monitoring.

LANGUAGES

English — Professional Proficiency (IELTS 7.5) Swedish — Elementary German — Intermediate Persian — Fluent Kurdish — Native
